SUMMARY

Enthusiastic and detail-oriented B.Tech Computer Science student with a strong interest in problem-solving, programming, full-stack development, and machine learning. Passionate about cybersecurity and intelligent systems, with hands-on experience building NLP-based applications and secure web platforms. Eager to apply knowledge in real-world projects, learn new technologies, and contribute to impactful software solutions in a dynamic environment.

WORK EXPERIENCE

Data Science & Machine Learning Intern | NeST Digital, Kochi (Feb 2026 – Mar 2026)

- Preprocessed and analysed real-world datasets, applying ML algorithms to build and evaluate predictive models using Python.
- Applied data preprocessing and model evaluation techniques for machine learning tasks.

Machine Learning Intern | Infosys Springboard (Virtual) (Oct 2025 – Dec 2025)

- Developed an NLP-based intelligent ticket classification pipeline using SpaCy, NLTK, BERT, Logistic Regression, SVM, Random Forest, and XGBoost for multi-label categorization and priority prediction.
- Built an end-to-end web application using Streamlit (Frontend), FastAPI (Backend), and SQLite for real-time ticket processing, entity extraction, and dashboard analytics.
- Implemented advanced data processing with scikit-learn, pandas, and imbalanced-learn (SMOTE) for class balancing, feature engineering, and model pipeline optimization.

PROJECTS

AI-Powered Ticket Classification System | *Python, SpaCy, NLTK, BERT, FastAPI, Streamlit, SQLite, scikit-learn, Logistic Regression*

- Developed an intelligent ticket management application with automated categorization, priority prediction, and named entity recognition using multiple machine learning models.
- Architected FastAPI backend with SQLite to handle ticket data processing and model inference, and integrated Streamlit frontend for real-time analytics and user interactions.

Ethical Hacking Simulation Portal | *HTML, CSS, JavaScript, FastAPI, SQLite, Docker*

- Developed an ethical hacking simulation portal with 9+ interactive challenges covering real-world vulnerabilities including SQL Injection, XSS, CSRF, and command injection attacks.
- Architected FastAPI backend with SQLite to manage user authentication, challenge progression, quiz assessments, tutorials, analytics, and leaderboard rankings with role-based admin controls.

Food Ordering System | *HTML, CSS, JavaScript, Flask, SQLite*

- Developed a comprehensive food delivery application with restaurant discovery, live order tracking, multiple payment gateways, and ratings/reviews.
- Architected Flask backend with SQLite to manage restaurant partnerships, real-time delivery logistics, order status updates, customer support, and advanced analytics for growth metrics.

EDUCATION

B.Tech – Computer Science and Engineering *2023 – 2027*
Amal Jyothi College of Engineering (Autonomous), Kanjirappally | **CGPA: 9.29 / 10.00**

Higher Secondary (Class XII – CBSE) *2023*
St. Antony's Public School Anakkal, Kanjirappally | **86.6%**

Secondary (Class X – CBSE) *2021*
St. Antony's Public School Anakkal, Kanjirappally | **95.4%**

SKILLS

Programming: Python, C, Java (Basic)
Web: HTML, CSS, JavaScript
Frameworks: Flask, FastAPI, Streamlit
Database: SQL, SQLite
Tools: GitHub, VS Code, Figma, Docker, Google Colab
Concepts: Data Structures, Machine Learning, DBMS, Web Vulnerabilities
Soft Skills: Teamwork, Adaptability, Time Management, Quick Learning

CERTIFICATIONS

- Cyfusion – UI/UX Design Competition (SAHYA'26) | Designed interfaces using Figma | 2026
- Database Management Systems – Elite | NPTEL (IIT Kharagpur) | 2025
- HTML5, CSS3 & JavaScript | Infosys Springboard | 2025
- Problem Solving through Programming in C | NPTEL (IIT Kharagpur) | 2024
- Carrier Essentials in Generative AI | Microsoft and LinkedIn | 2024
